Philip Gibbs, the English writer, tells of the "heroic feats of the German army." He should have spelled it "feet" if he means those used in hiking towards Berlin.

Austria, as a government is left with a territory smaller than Christian county, but populated by 7,000,000 people. The peace terms disposed of all the rest of the dual empire by setting up the four nations of Serbia, Poland, Jugo-Slavia and Czechoslovakia. The Plague of Tongues. One tongue for the builders of America. Once a king had a dream. He said he would make this dream come true. He would build a tower to heaven, where the gods lived.

Quickly he called his builders. Smartly they set to work. Higher and higher rose the tower. Soon it would reach heaven.

The gods looked out and said: "No, no; you shall never reach heaven."

They sent the plague of tongues. And the builders could work no more for they could not understand each other. They quarreled bitterly. The gods laughed. The tower never reached heaven.

One tongue for the builders of America. Learn English.—Americanization.

With the closing of the school year comes an accident which saddens the hearts of the community at large. Charlie Johnson, 14 years old, son of Mr. and Mrs. C. W. He is a bright and promising boy who has many friends who wish for his speedy recovery.

### SUPREME COURT SAYS WAR POWERS CONFERRED SUPREME AUTHORITY

ALL INJUNCTIONS DISOLVED

Public Has No Relief From Exorbitant Charges Imposed By Government.

Washington, June 3.—Increased railroad, telephone and telegraph rates ordered by the Railroad Administration and the Postmaster General respectively, were sustained Monday by the Supreme Court, which held that the war powers conferred by Congress upon the President included sweeping control over the railroad and wire systems with "supreme and conclusive" authority to fix intrastate rates.

These questions were decided in two opinions rendered by Chief Justice White, the only relative to the railroad rates being unanimous, while Justice Brandies dissented in the telephone and telegraph decision, but without rendering a separate opinion. The opinions affect litigations which have been instituted in about forty States and which involved the validity of both rate orders.

As a result of the court's opinion, injunctions restraining the Director General of Railroads from enforcing an order increasing freight and passenger rates in North Dakota were dissolved. The court also upheld the dismissal of proceedings brought by Massachusetts State authorities to prevent intrastate telephone rates in that State being increased and set aside injunctions preventing advance of telephone rates in South Dakota and telegraph rates in Illinois.

In addition the court also dismissed an original suit brought by the State of Kansas against the Postmaster General seeking to have the rates prescribed by him in that State declared unreasonable and to prevent them from being made effective. In deciding the cases the court held that the resolutions under which the government took over control of these utilities, together with the President's proclamations and the railroad control act, gave the United States "complete possession and control" under the war powers and that Congress had a right to confer these powers upon the President.
